At Goldfingers, you will receive the best service, professionalism and artistic efforts available. We pride ourselves on having a hygienic and comfortable environment for your beauty needs.

Microdermabrasion

Goldfingers, microdermabrasion technique is the most effective, non-surgical procedure for the treatment of aging, brown spots, fine lines and wrinkles, pigmentation, scars, acne scars, large pores, stretch marks, dull and sun damaged skin. Fight the signs of aging BEFORE they appear.

Goldfingers also offers expert body massage for your therapeutic and relaxation needs. Please call us to schedule an appointment or free consultation regarding any of our services.

Microdermabrasion by Goldfingers is fast and pain-free, leaving very little temporary redness. We often use it to treat and minimize many difficult skin conditions and to simply rejuvenate and maintain optimum skin health. Microdermabrasion at Goldfingers is the safest and most effective alternative to laser resurfacing or chemical peels with absolutely no down time.

Permanent Makeup

Permanent makeup by Goldfingers can diminish your need for makeup, define features, fill in brows that are sparse, enhance your lips, frame your eyes, camouflage scars and much more. Permanent makeup can be subtle or dramatic depending on your needs and desires. The best permanent makeup looks so natural no one knows you have it!

Who benefits from permanent makeup?

- ♣ Busy people with little time for daily make-up applications
- ♣ People with allergies to conventional make-up
- ♣ People with poor vision, or contact lens wearers

Dysport/Botox

Make the presence of fine line and wrinkles disappear by using these great products. By relaxing the musculature of the face we can essentially take years off your appearance. Dr. Young will personalize your therapy with specific concentrations and dosages that will maximize the effects.

Restylane/Perlane

These cosmetic dermal fillers replace lost volume and restore youthful contours to the skin to smooth away moderate to severe facial wrinkles and folds, such as the lines from the nose to the corner of your mouth (nasolabial folds).

Restylane has been used in over 1.4 million treatments in the US and is available in over 70 countries. It is the most studied cosmetic dermal filler in the world with dozens of medical publications.
